MVP: Enter desired study duration and track time spent studying versus doomscrolling.
I

| DO | SCHEDULE |
| --- | --- |
| ● 3 timers (overall, studying, and scroll timer)<br>● Allow users to pause and resume timers<br>● Generate productivity report<br>● Save data history using File I/O | ● User-set scrolling limits<br>● Display productive trends over time |
| **DELEGATE** | **DELETE** |
| ● Use Java's Scanner<br>● Use thread tools in project<br>● Find timer utilities in Java instead of creating a custom clock | ● Depending on the time of year, the program is stricter on social breaks(test, finals season)<br>● Create leaderboard comparing other users' productivity - competition between friends |
